Flower: Rose

It's one of the earliest flowers known to man. Nebuchadnezzar, the king of Babylonia around 560 BC, used roses to decorate his home. In Persia, these fragrant flowers were grown for perfume oil, while the Greeks associated the red rose with the blood of Aphrodite's beloved Adonis, the deity of plants and rebirth. Red roses symbolize love.

Birthstone: Pearl

The pearl is the birthstone for the month of June, although it isn't really a stone. Pearls are created by mollusks such as clams and oysters. A pearl's color is determined by the type of mollusk and the water where the mollusk lives. Pearls are often lustrous white but can be tinged with pink, peach, green, lavender, and gold. Some are even silvery black.
