Flower: Rose

It's one of the earliest flowers known to man. Nebuchadnezzar, the king of Babylonia around 560 BC, used roses to decorate his home. In Persia, these fragrant flowers were grown for perfume oil, while the Greeks associated the red rose with the blood of Aphrodite's beloved Adonis, the deity of plants and rebirth. Red roses symbolize love.

Birthstone: Pearl

The pearl is the birthstone for the month of June, although it isn't really a stone. Pearls are created by mollusks such as clams and oysters. A pearl's color is determined by the type of mollusk and the water where the mollusk lives. Pearls are often lustrous white but can be tinged with pink, peach, green, lavender, and gold. Some are even silvery black.

In the Olden Days

In June 1901, the average annual income was $1,009. A gallon of milk cost $0.27, and a loaf of bread would set you back $0.03.

1960's Car Facts

In 1960, car buyers were demanding smaller vehicles. Compact cars were marketed heavily by every automobile manufacturer, in stark contrast to the 1950s. New models included the Ford Falcon, the Chevrolet Corvair and the Plymouth Valiant.

U.S retail buyers had 266 different models to choose from. The 4-door sedan was still the best seller, but station wagons were increasing in popularity and ranked second in all sales over the sportier 2-door vehicle.
